to the port, particular for its pentagonal walls, designed by Carlo Vanvitelli as a warehouse for incoming goods, as a defense structure for the city but especially as Lazzaretto. Visit of underground Ancona, under the modern unexpected places. Visit to the underground Cisterns of the Fountain of Calamo, one of the symbols of Ancona. This is also called Fountain of the Thirteen Cannelle because of thirteen vents from which it flows water. The exact date of its construction is not known, but in 1426 it was already equipped with tanks, the ancient large underground cistern that received the water from the aqueduct coming from Monte Conero, currently can be visited through a passage that opens to the right of the fountain. Continuation to Osimo. Visit to the Caves of Cantinone; a tunnel of 300 meters under the covered market, used since the time of the ancient Piceni. On the sandstone walls you can still see the signs of man's work done with rudimentary tools. The bas-reliefs and the figures that can be admired in the Grotte del Cantinone are purely religious, probably here the friars came down to find themselves in prayer or to stay alone in absolute silence, far from the noise of the surface. But if the Caves of the Cantinone preserve religious symbols, in those of Piazza Dante we find reliefs with a strong esoteric connotation, due to characters historically linked to the Carboneria and the Masonic lodges, such as the Count Cesare Gallo. Free time to visit the town: the Cathedral of San Leopardo and Santa Tecla, in Romanesque-Gothic style, the Basilica of San Giuseppe da Copertino, and the Palazzo civico located in Piazza Boccolino. Return to the hotel, dinner and overnight.
